Any engines with unconfirmed Recommended On The Road Price will not be available to order until Quarter 1 2019 (subject to availability).

The Recommended 'On The Road' price includes delivery charge to Dealer and number plates, one year's Road Fund Licence at the 1st year rate (£0 - £2,070 depending on the CO₂ output of the vehicle), and the new vehicle registration fee (£55). VAT is calculated at 20.0%. SEAT may change RRP's at any time (this includes where there are government changes in regulation and/or legislation). There may be a delay to any RRP displaying correctly on our materials. Always obtain prices from your chosen SEAT Dealer. Figures shown are for comparability purposes; only compare fuel consumption and CO₂ figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend on a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. There is a new test used for fuel consumption and CO₂ figures (known as WLTP). The CO₂ figures shown however, are based on a calculation designed to be equivalent to the outgoing (NEDC) test cycle and will be used to calculate vehicle tax on first registration. For more information, please see www.seat.co.uk/wltp or consult your Dealer. Data correct at 02/2019.

1. The maximum power output figures are quoted in PS (or Pferdestärke, which is the metric equivalent of horsepower). To convert from metric to imperial horsepower, divide the PS by 1.0139.

2. Where law permits.

3. Figures shown are for comparability purposes; only compare fuel consumption and CO₂ figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend on a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. There is a new test used for fuel consumption and CO₂ figures (known as WLTP). The CO₂ figures shown however, are based on a calculation designed to be equivalent to the outgoing (NEDC) test cycle and will be used to calculate vehicle tax on first registration. For more information, please see www.seat.co.uk/wltp or consult your Dealer. Data correct at 02/2019.

Dimensions Leon ST CUPRA 300

Technology.

Start/stop system.

When the car is stopped, the gear lever set to neutral and the clutch pedal released, the start/stop system switches the engine off. Once the clutch is engaged again, the engine starts automatically.

Energy recovery system.

An energy recovery system works by varying the amount of power absorbed by the alternator. During braking, power which would otherwise be wasted is drawn into the electrical systems and battery. Under acceleration, the alternator draws less energy, so more can be sent to driving the wheels.

AdBlue®.

The use of AdBlue® helps the environment by reducing the number of harmful emissions created by diesel engines. For full details on fuel consumption, CO₂ figures and VED bands (Vehicle Excise Duty) please see page 28.

Vehicle excise duty.

All new vehicles are subject to a form of Vehicle Excise Duty (VED) based on the type of fuel the vehicle uses and its carbon dioxide (CO₂) emission level, measured in grammes per kilometre (g/km). To help you identify the duty you will pay, the DVLA has created thirteen bands. The table below shows the 12-month Road Fund Licence (RFL) rate for petrol and diesel cars:

Effective from 1 April 2018 until 31 March 2019.

CO ₂ g/km	1st year rate	Standard rate
0	£0	£0
1	£10	£140
51	£25	£140
76	£105	£140
91	£125	£140
101	£145	£140
111	£165	£140
131	£205	£140
151	£515	£140
171	£830	£140
191	£1,240	£140
226	£1,760	£140
256	£2,070	£140

The Autumn Budget 2017 announced that new diesel vehicles registered after 1 April 2018, that do not meet the RDE2 standard will be charged a supplement on their 1st year rate, to the effect of moving up by one VED band. Currently all SEAT diesel engines are affected by this supplement.

Fuel consumption and CO₂.

Fuel consumption and CO₂ figures are obtained under WLTP technical procedures. Figures shown are for comparability purposes and may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

Please refer to and use the fuel consumption figures marked WLTP and CO₂ emissions figures marked NEDC equivalent for comparisons as of 1 January 2019. These are the official figures for the UK from 1 January 2019 and until further notice. Avoid making comparisons using the fuel consumption figures marked NEDC equivalent after 31 December 2018 or the CO₂ emissions figures marked WLTP before 6 April 2020 - these figures are not official after/until that date and are provided for information only.

Only compare fuel consumption and CO₂ figures with other vehicles tested to the same technical procedures. Due to more realistic test conditions, the fuel consumption and CO₂ measured under WLTP are in many cases higher compared to NEDC equivalent data.

The NEDC CO₂ figures shown however, are based on a calculation designed to be equivalent to the outgoing test cycle and will be used to calculate vehicle tax on first registration. For more information, please see www.seat.co.uk/wltp or consult your Dealer.

Additional information can be found at www.vca.gov.uk

Benefit in kind tax.

How to calculate your liability

The Benefit in Kind (BIK) value is calculated by taking the On The Road (OTR) price of the vehicle, less the RFL and first registration fee. This figure, known as the P11D value, is then multiplied by a percentage value based on the CO₂ emissions of the vehicle.

- For tax year 2018/19, the banding starts at 13%, applicable to cars which emit between 0 and 50 g/km (a 4% surcharge exists on all diesels that emit less than 180 grammes of CO₂ per kilometre) and that do not meet the RDE2 standard.
- Cars which emit between 95 and 99 g/km attract a charge of 20%.
- Cars which emit between 100 and 104 g/km attract a charge of 21%. Every 5 g/km increase from 105 g/km adds 1% to the banding.
- The maximum charge is 37%.
- The exact CO₂ figure is always rounded down to the nearest 5 g/km (e.g. emissions of 139 g/km would be charged at the rate for 135 g/km).

To find out how much you will pay, simply multiply the BIK value by the percentage level of income tax that you pay, which will vary depending on where in the UK you pay your tax.

BIK calculation example – Leon 5dr SE 1.0 TSI 115PS

P11D value (OTR price less RFL and first registration fee)	£18,060.00
CO ₂ emissions (g/km)	109
Company car BIK tax based on CO ₂ emission level	22%
Taxable BIK (for 2018/19 tax year): 22% of £18,060.00	£3,973.20
Annual company car tax (2018/19)	
20% income tax: 20% of £3,973.20	£794.64 per annum
Monthly company car tax (2018/19)	
20% income tax: £794.64 divided by 12	£66.22 per month

Fuel benefit charge

If your employer provides you with free fuel, this is treated as an additional taxable benefit. The charge for the 2018/19 tax year is based on a set figure of £23,400.00, and uses the same percentage figure used to calculate your company car BIK value.

Fuel benefit charge example – Leon 5dr SE 1.0 TSI 115PS

The percentage used to calculate the BIK value for the Leon 5dr SE 1.0 TSI 115PS is 22%. If free fuel is supplied with this car for the 2018/19 tax year, the fuel benefit will be:

$$£23,400.00 \times 22\% = £5,148$$

$$\text{At 20\% income tax: } £5,148 \times 20\% = £1,029.60$$

Effect of wheel size on CO₂

Choosing larger wheels than standard as options may result in increased fuel consumption as well as higher CO₂ emissions and consequently increased VED and BIK rates. This is due to larger wheels having both more aerodynamic drag and more mechanical drag, resulting in increased rolling resistance and increased wind resistance.

As a result, the VED band that the vehicle falls into may increase. In some instances, the OTR price for the vehicle may increase as a result of the increased VED rate. None of the Leon models are affected by this regardless of the optional wheels chosen.

Peace of mind.

The SEAT Warranty Three-year Warranty.

All new SEATs registered in the UK come with a three year/60,000 miles warranty, which protects your car against the failure of most mechanical and electrical components due to manufacturing defects. This comprises a two-year manufacturer's warranty with unlimited mileage plus a further one-year/60,000 (whichever is soonest).

Dealer Warranty.

Should the mileage exceed 60,000 miles within the first two years, the manufacturer's two-year warranty will still be valid. If an additional warranty for subsequent years or higher mileage is desired, it may be purchased from an authorised SEAT Dealer or repairer, however, this additional warranty must be purchased before the mileage reaches 60,000. Cover is subject to the car being serviced and maintained according to the manufacturer's technical guidelines.

Full details of the three-year warranty are available from your SEAT Dealer or repairer.

SEAT Extended warranty

If you take out a SEAT Extended warranty before your new car is registered, you'll get exactly the same level of cover as the three year warranty, but for up to five years. You can choose a SEAT Extended warranty to last until the end of the 4th year/up to 75,000 miles or until the end of the 5th year/up to 90,000 miles (whichever is soonest).

Please note: SEAT Extended warranty products are only available at the time of ordering your new SEAT.

Three-year Paint Warranty

The paintwork of all models featured in this price list is covered against manufacturing defects for a period of three years. Naturally, the vehicle must be cared for in compliance with the operating instructions which will be found in your vehicle handbook.

Please consult your authorised SEAT Dealer or repairer for full warranty details.

Peace of mind.

Twelve-year Body Protection Warranty

The internal body sections and panels of the models featured in this price list are covered against rusting through from the outside for twelve years. Naturally, the vehicle must be cared for in compliance with the operating instructions which will be found in your vehicle handbook.

Please consult your authorised SEAT Dealer or repairer for full warranty details.

SEAT Parts Warranty

SEAT parts and accessories supplied after new vehicle delivery are covered by our 24 months parts warranty.

SEAT Insurance

Insurance works alongside your existing main motor insurance policy no matter who it's from, giving you three years FREE cover on all new and used SEATs. Activate your policy at [seat-ensurance.co.uk](https://www.seat-ensurance.co.uk) and get one-stop accident management in the event of an accident or theft. After activation, you'll receive a confirmation email and Cover Booklet PDF with full terms and conditions.

SEAT Roadside Assistance (including European cover)

Any new SEAT purchased and registered in the UK from an authorised SEAT Dealer, is covered free by SEAT Assistance (including European cover) for roadside repairs or recovery to an authorised repairer for a term of two years. Your member of the SEAT authorised network will ensure that all servicing and repairs are carried out in accordance with the manufacturer's instructions. Terms and conditions apply.

Specifications

Specifications refer to Model Year 2019. While SEAT makes every effort to make sure that specifications are accurate at time of going to press (02/2019), you should always check details with your SEAT Dealer as there may have been changes in view of SEAT's policy of continuous product improvement. The right is reserved to change specification and colour at any time. The information in this price list can therefore be given as guidance only.

SEAT is committed to a policy of continuous product development and reserves the right to make changes to specifications, colours and prices without notice. The information in this pricing and specification list can therefore be given as guidance only. While SEAT makes every effort to ensure that specifications are accurate at the time of publication, you should always check with your authorised SEAT Dealer for the latest information. The information in this document refers to model year 19 vehicles. Due to limitations of the printing process the colours reproduced in this pricing and specification list may vary slightly from the actual paint colour and material. These vehicles and all their parts, as well as the original spares, were designed according to the Legal Regulations governing the prevention and minimisation of Environmental Impact, through the use of recycled/recyclable materials, with measures taken to achieve suitable recycling for the conservation and improvement of environmental quality. SEAT UK has made provision for the correct disposal and recycling* of all SEAT Vehicles when they are delivered by the customer to its national network of Environment Agency authorised treatment facilities. This service is offered at no cost to the last holder and applies to SEAT vehicles of any age which are substantially complete.

The service is provided by Cartakeback.com and to find your nearest facility contact 0845 257 32 33 or browse to www.cartakeback.com.

*Since 2006 all vehicles returned to SEAT were certified by UK Government to be recycled to 85%.
